

GROW YOUR PRACTICE

WHAT CLINICS EARN WITH CELLUNOVA

\$57,485

average additional annual revenue per partner clinic¹

Regenerative biologics give physicians a new service their patients are already asking for - added to the rooms, staff, and appointment slots a clinic already runs.

Why it adds up

A NEW SERVICE LINE

A premium, physician-directed treatment line that fits inside the appointments a clinic already books.

DEMAND THAT'S ALREADY THERE

Patients bring up regenerative medicine before clinics bring it up. CelluNOVA lets a practice say yes.

NO BUILD-OUT REQUIRED

Cold-chain logistics, certificates of analysis, protocol libraries, and physician training ship with the partnership. No lab, no new hires.
