I HAVE READ AND UNDERSTAND EACH STATEMENT BELOW — INITIAL EACH LINE

☐

The therapy proposed to me uses a human-tissue-derived biologic product that is **not approved by the FDA** to diagnose, treat, cure, mitigate, or prevent any disease, and its use for my condition is investigational and/or off-label.

☐

No specific result has been promised or guaranteed to me. My condition may improve, stay the same, or worsen, and I may need additional treatment.

☐

Risks were explained to me, including pain, bruising, bleeding, swelling, infection, allergic or inflammatory reaction, nerve or vessel injury, failure to improve, and rare serious reactions requiring emergency care.

☐

Alternatives were explained to me, including observation, medication, physical therapy, injections such as corticosteroid or hyaluronic acid, surgery, and doing nothing.

☐

I understand this treatment is **self-pay**, is generally not covered by insurance or Medicare, and that fees are for the procedure and materials regardless of outcome.

☐

I consent to photography and to the recording of de-identified outcome data for quality review, and I may decline this without affecting my care.

☐

I had the opportunity to ask questions, my questions were answered, and I may withdraw consent at any time before administration.

☐

I have received a copy of this signed form and written post-procedure instructions, including who to call and when to seek emergency care.
